

ENVIRONMENT WORKING GROUP - Presentation du CIVL plenary

Report has been send to delegates with the CIVL plenary documentation (Annex 12)  
It is a rather new commission - some work has been done during the year mostly through mail

FAI: Environment is a real concern ! or “should be”, any how “will be” soon or later  
FAI Env Committee to work on this matter

AIM : Raise awareness of air sport practitioners and the public opinion that “air sport activities” and  
“care for the environment” can indeed be combined

In addition to the report : 2 weeks ago : FAI Env C meeting in Frankfurt ! Good and long working day  
For us specific points : compare with other flying sports : No motor, no noise / no emissions, but still  
some concerns

.....  
On-going work

- \* Provide relevant information on environment matters related to flying (translate articles to English, to be put on FAI WebSite) : specific information / experience on how to deal with environmental Pb, awareness, .... from your country can be of benefits to others ! Please let me know.
- \* Consider Interaction with other FAI commission, related organisation (EUVL) and outside organisations
- \* Code of conducts : general rules + rules for each activity -> with have to define our specific rules (in relation with the bureau)
- \* Environmental Management of Flying Sites (some tests are done in Germany – Klaus ?)
- \* Environmental requirements / assessment for competition, events (WAG)
- \* Environmental Charter : translating into English – circulate again, to get comments.  
+ Provide information and expert views (help CIVL and federations to progress on the matter and solve Pb, ....)

.....  
+  
Environmental Charter  
Bid : environmental chapter
