

**PROPOSAL FROM THE AUSTRIAN AERO CLUB FOR A
DEFINITION OF AN ANNEX TO THE SPORTING CODE
FOR SCORING SOFTWARE
15 December 2006**

It is proposed:

to define an Annex to the Sporting Code to describe the technical requirements for scoring software.

Reasons for supporting the proposal:

- we do have an annex for flight recorders, but not for scoring software
- we sometime do not know how the scoring software does the calculation
- all scoring should be done under an equal environment
- if you use different software and different algorithms the output is different
