

CIVL 2025 PLENARY – ANNEXE 39 H
PROPOSAL ITALY: COMPETITION VALIDITY

Background

The S7A chapter 5.1 use 1500 points as benchmark for competition validity but treat them differently for HG and PG. With current wording in PG it may happen that a pilot wins 2 tasks in a row and at the end he has less then 1500 points according to FTV rules.

We propose to keep into consideration also the FTV

Proposal: to change S7A 5.1

Old version

HG - The competition will be deemed valid for the purposes of awarding championship titles if the sum of the available points for all the tasks flown must be equal to or more than 1500 points, as determined by the authorised scoring formula.

PG - The competition will be deemed valid for the purposes of awarding championship titles if the sum of the daily winners' scores is equal to or more than 1500 points, as determined by the authorised scoring formulas.

New version

HG - The competition will be deemed valid for the purposes of awarding championship titles if the sum of the available points for all the tasks flown must be equal to or more than 1500 points, as determined by the authorised scoring formula.

PG - **The competition will be deemed valid for the purposes of awarding championship titles if the competition had at least one valid task held.**
