

CIAM FAI
Report of the RC Soaring Subcommittee
Activities from April to November 2012

The RC Soaring Subcommittee has fifteen members. All matters were discussed by e-mail. Technical Meeting about F3F rules was held during the F3F World Championship in Germany. At the F3J World Championship an inquiry was prepared dealing with the future of the F3J class.

F3J

The F3J World Championships at Johannesburg (RSA) was a successful event. The weather was unusual because there was wintertime on the southern hemisphere. At the Championships the International Jury organised an inquiry about the future development of this class. The outcome of the inquiry will be further discussed in the Subcommittee. The rule freeze allows submitting any proposals of rule change only for the CIAM Plenary Meeting 2014.

F3B

There was no continental championship organised this year. The rules of this class are well stable and therefore the Subcommittee prepared only one minor clarification for the following CIAM Plenary Meeting.

F3K

The F3K European Championships were at Chambley (FRA). Subcommittee prepared some suggestions for clarification of the rules F3K. In the future it will be necessary to look for more complex tasks, because the best pilots fly too often maximum period and the results are very close together. It's the same problem as the class F3J.

F3F

There was the first World Championship organised in this class. This World Championship was very successful, the organisation was perfect and also the online video transmission on Internet was a new and commendable activity. At the Championship there was held a Technical Meeting at which some proposals for rule amendment were discussed. The discussion will continue within the Subcommittee during the next year.

4th November 2012

Tomas Bartovsky
RC Soaring Subcommittee Chairman
